Oleksander Pyavchik

AUTOMATION QA ENGINEER

pyavchik@gmail.com · +380 63 997 7874 · Odesa, Ukraine

PROFESSIONAL SUMMARY

Experienced Automation QA Engineer with 7+ years of expertise in test automation, CI/CD, and test framework development. Strong background in **iGaming** — tested HTML5 slot games, casino platforms, and gaming back-office systems. Built automation frameworks from scratch, maintained 1500+ tests, and delivered performance testing using JMeter. Solid expertise in Java, API, end-to-end, and cross-browser testing.

WORK EXPERIENCE

AQA Engineer at EG

2021 – 2025 · Remote

- Worked in a team of 5 QA automation engineers
- Wrote automated tests for an existing automation framework
- Maintained and updated over 1500 automated tests
- Ensured test stability and reliability across multiple environments
- Used AI tools to accelerate automated test generation and maintenance

AQA Engineer at Digicode

2019 – 2021 · Kiev

- Tested online casino platform and HTML5 slot games across all development phases
- Built UI end-to-end automation framework for casino product from the ground up
- Developed API automation test framework for game server and payment integrations
- Created comprehensive test plans covering game mechanics, RTP validation, and bonus features
- Designed and implemented JMeter tests for load testing of game servers

Manual/Automation QA at Innovation Group

2014 – 2019 · Odesa

- Tested HTML5 slot games, roulette, and card games across browsers and devices
- Validated game rules, payout tables, and RTP compliance for multiple game titles
- Tested admin panel, game history, payment systems, and partner program modules
- Supported and enhanced automated tests for iGaming products using Java
- Wrote detailed test cases and test documentation for game certification
