Professional Summary

Experienced Automated QA Engineer with 7+ years of expertise in test automation, CI/CD, and test framework development. Strong experience building automation frameworks from scratch and maintaining large test suites, with solid expertise in Java, API, end-to-end, and performance testing using JMeter.

Work Experience

AQA Engineer at EG (remotely) 2021 – 2025

- Worked in a team of 5 QA automation engineers
- Wrote automated tests for an existing automation framework
- Maintained and updated over 1500 automated tests
- Ensured test stability and reliability across multiple environments
- Used AI tools to accelerate automated test generation and maintenance

AQA Engineer at Digicode, Kiev 2019 – 2021

- Created comprehensive test plans from scratch
- Built UI end-to-end automation framework from the ground up
- Developed API automation test framework independently
- Designed and implemented JMeter tests for load testing scenarios

Manual/Automation QA at Innovation Group, Odesa 2014 – 2019

- Supported and enhanced automated tests using Java
- Performed manual testing of web and mobile applications
- Wrote detailed test cases and test documentation
- Collaborated with developers to resolve issues quickly
