

Oleksander Pyavchik

QA ENGINEER

pyavchik@gmail.com +380 63 997 7874 Odesa, Ukraine

PROFESSIONAL SUMMARY

QA Engineer with 7+ years of experience across manual QA, test strategy, requirements analysis, API/SQL validation, UI/E2E automation, CI/CD, and regression coverage. Built QA processes and automation from scratch, maintained 1500+ automated tests, and delivered reliable reporting with Jira, Zephyr, Confluence, and Allure.

WORK EXPERIENCE

QA Engineer at Bestprice 2025 – 2026 · Remote

- Built QA strategy and test process from scratch for an e-commerce / price-comparison product
- Converted product requirements into structured Confluence documentation and QA-ready acceptance criteria
- Designed test cases in Zephyr from requirements and maintained regression coverage
- Created clear bug reports in Jira with steps, expected/actual results, evidence, severity, and priority
- Automated regression tests using TypeScript, Playwright, and Allure reports

QA Automation Engineer at EG 2021 – 2025 · Remote

- Worked in a team of 5 QA automation engineers
- Wrote automated tests for an existing automation framework
- Maintained and updated over 1500 automated tests
- Ensured test stability and reliability across multiple environments
- Used AI tools to accelerate automated test generation and maintenance

QA Automation Engineer at Digicode 2019 – 2021 · Kiev

- Tested online casino platform and HTML5 slot games across all development phases
- Built UI end-to-end automation framework for casino product from the ground up
- Developed API automation test framework for game server and payment integrations
- Created comprehensive test plans covering game mechanics, RTP validation, and bonus features
- Designed and implemented JMeter tests for load testing of game servers

Manual/Automation QA at Innovation Group 2014 – 2019 · Odesa

- Tested HTML5 slot games, roulette, and card games across browsers and devices
- Validated game rules, payout tables, and RTP compliance for multiple game titles
- Tested admin panel, game history, payment systems, and partner program modules
- Supported and enhanced automated tests for iGaming products using Java
- Wrote detailed test cases and test documentation for game certification
